#### What and Who are Stripe Payments?

To provide online payments and to facilitate the transfer of funds between seller and buyer, RCTrader.com uses Stripe Payments and PayPal Payments. Both are PCI Service Level Provider 1 payments gateways. This means that they are audited by PCI auditors that make sure the gateways comply with the most up to date online security measures. For instance, Stripe uses tokenization which means that credit card details are NEVER stored with RCTrader.com. Instead, the details are inputted directly into Stripe's self-hosted credit card feature.

Stripe is a robust solution, as such, it is used by the following businesses for online transactions:

# Booking.com
