

Payment Between Users

How to request secure payment after negotiating a price?

After a buyer and seller have settled on a purchase price for an item, the Seller (or Buyer) can send an RCTrader Payment Request to a Buyer (or seller). This is done to utilize the added security of the RCTrader Escrow system and to protect all parties.

For a Seller to initiate a Payment Request to a Buyer, the Seller must have:

1. The Listing ID# (this can be obtained from the My Account section of the website)
2. The Buyers/Sellers Email Address
3. The agreed price (this is the total sum of money that must be paid and includes both the item price and shipping cost)

Step 1:

Online Purchase Requests

You can manage all of your purchase requests with sellers and buyers below. Sent requests are to a buyer, and received requests are from a seller.

[Request Payment](#) [Manage Purchase Settings](#)

Buying Selling

Listing	Amount	Date	Payment	Status	Actions
(#)	2,500	Feb 5, 2021	Completed Feb 5, 2021	Completed	

Step 2:

Send Purchase Request

You are about to send a payment request to a buyer through our secure payment system. They will be notified of this request and their payment will be held in escrow within our system until the transaction is complete in accordance with our policies.
